DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer, filed together with the response dated, December 2, 2004, is acknowledged which effectively disclaims the terminal part of the statutory term of the patent granted on the current application which would extend beyond the expiration date of the full statutory term of the Bunton et al. patent (USP 6,765,922).

Allowable Subject Matter

2. Claims 5-32 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The Examiner has not found a method or system for transmitting data packets wherein a logical buffer is configurable in at least two modes [(1) store and forward, and (2) FIFO] where, upon starting packet transmission, is initially configured in FIFO mode and if a data input rate to the logical buffer is less than the data output rate from the logical buffer (data-under-run), a timer starts, and if the timer times-out, abandoning the transmission and reconfiguring the buffer to a store-and-forward buffer to store all data to be transmitted provided by said data source prior to outputting data to be transmitted in a packet.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
